

When?

The workplace assessment **must** be carried out as soon as possible after the staff member has informed her workplace of the pregnancy.

Who?

Managers, OHS representatives or pregnant staff members may decide to initiate a pregnancy work place assessment (APV).

How is the pregnancy workplace assessment conducted?

Prior to the meeting, pregnant staff members may enter their own notes in the form; or the form may be used by the manager or the local OHS group as an interview guide. During the meeting, remember to bear in mind that the aim of the pregnancy workplace assessment is to ensure a safe working environment for the pregnant staff member and to identify any risks relating to the staff member’s work tasks and workplace. Solutions may be found by the pregnant staff member and the local OHS group, but also by her colleagues.

NAME:

Physical work environment	Yes	No	Comments
Do you feel that your workplace is currently <i>adapted</i> to your needs during your pregnancy?			
Do you feel that you are able to <i>adjust</i> your working posture to make yourself more comfortable (height adjustable desk, anti-fatigue mats, fitness ball, etc.)?

<p>Do you work with <i>biological materials</i>?</p> <ul style="list-style-type: none"> Do you feel safe working with biological materials? Are you aware that some vaccinations may be given to you during pregnancy? Further information (in Danish) 			
<p>Do you work with laboratory animals?</p> <ul style="list-style-type: none"> Are you aware of the risks of working with laboratory animals during pregnancy? It is recommended that you ask your doctor for a blood test to determine whether you have antibodies for toxoplasmosis Toxoplasmosis and ornithosis may damage the unborn baby Further information (in Danish) 			
Back to work			
<p>If you were to describe the ideal situation of returning to work following your maternity leave, what would the first three months look like?</p> <ul style="list-style-type: none"> How can your workplace support you in realising this ideal? 			

Suggestions

- Adjust work hours or tasks
- Offer physiotherapy services
- Strengthening and stretching exercises for affected muscle groups
- Finding solutions through joint discussions with the staff member's closest colleagues
- 'Extended' staff performance and development review

Remember to familiarise yourself with the Danish Working Environment Authority's annex to the Executive Order no 559 on the Performance of Work on ['Pregnant workers and workers who are breastfeeding'](#) – on agents, work processes and working conditions.
